## Jenkins Container is running in the docker desktop

The screenshot shows the Jenkins web interface. The browser tabs at the top are 'Jenkins Pipeline Docker Setup' and 'Dashboard - Jenkins'. The address bar shows 'localhost:8080'. The Jenkins logo and name are at the top left. Navigation links include '+ New Item' and 'Build History'. A sidebar on the left shows 'Build Queue' (0 builds) and 'Build Executor Status' (0/2). The main content area says 'Welcome to Jenkins!' and provides instructions on how to get started. Below this, there are three buttons: 'Create a job', 'Set up a distributed build', and 'Learn more about distributed builds'.

The screenshot shows a Windows terminal window with a dark background. The title bar at the top reads "Command Prompt - docker e" and includes standard window controls. The terminal content is as follows:

```
jenkins@fcf39a5ec3c5:/$ exit
exit

```

The Windows taskbar is visible at the bottom, showing the Start button, search icon, and several pinned application icons. The system tray on the right indicates the time as 19:03 on 27-06-2026, along with icons for language (ENG IN), network, and battery status (66%).

## Creating a New item (pipeline)

Jenkins Pipeline Docker Setup x New Item - Jenkins x + Ask Gemini

localhost:8080/view/all/newJob

Jenkins / All / New Item

### New Item

Enter an item name

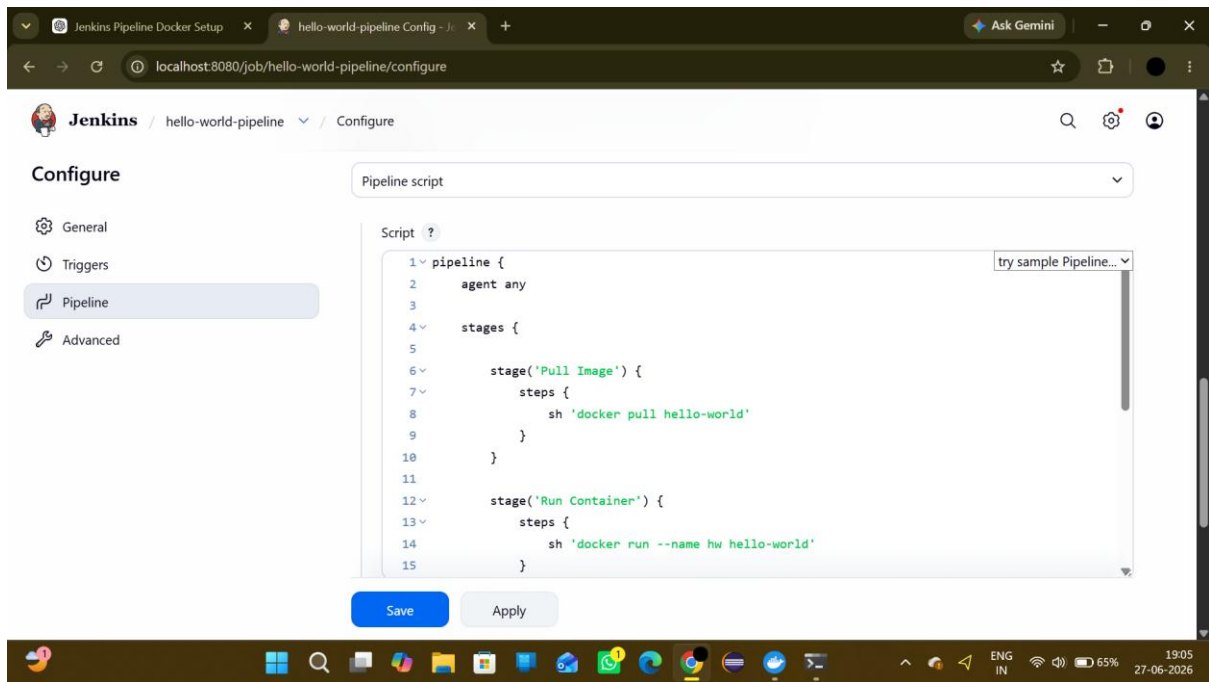

hello-world-pipeline

Select an item type

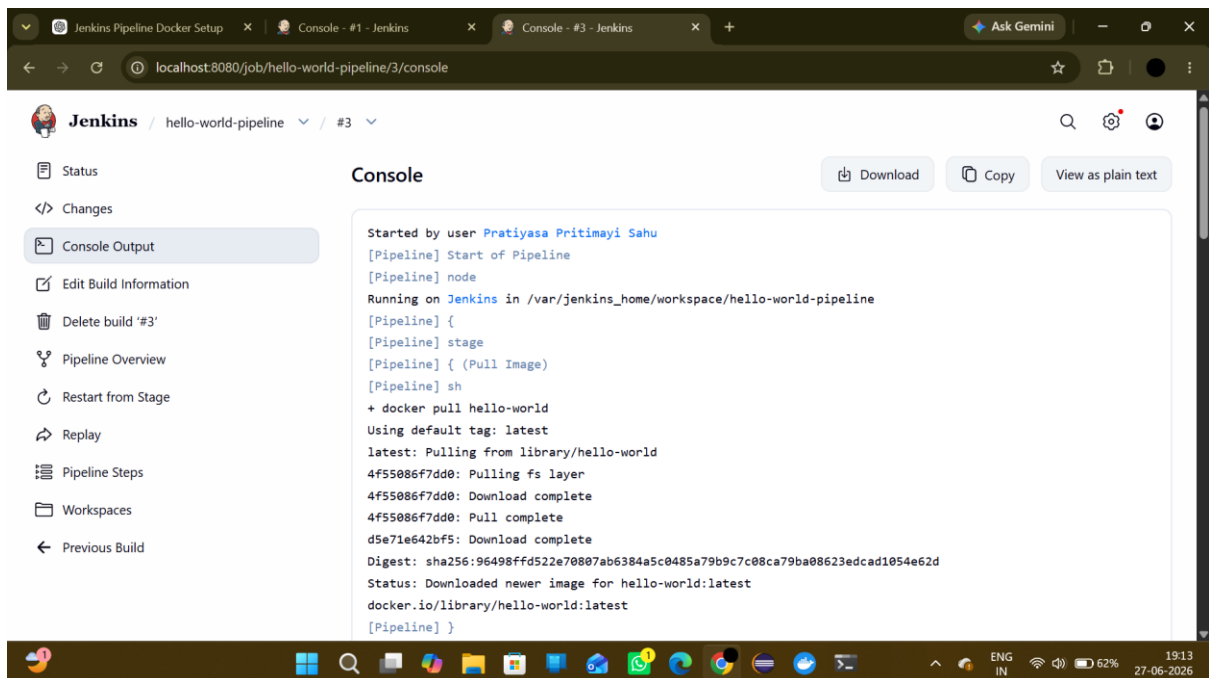

-  **Pipeline**  
Build, test, and deploy using pipelines. Supports stages, parallel work, and running on multiple agents.
-  **Freestyle project**  
Classic, general-purpose job type that checks out from up to one SCM, executes build steps serially, followed by post-build steps like archiving artifacts and sending email notifications.
-  **Multi-configuration project**  
Suitable for projects that need a large number of different configurations, such as testing on multiple environments, platform-specific builds, etc.

OK

# Pipeline script to pull Hello world image and run the container

## Console output after build now success

# Hello world image and container in docker desktop

The image displays two screenshots of the Docker Desktop application interface, showing the 'Images' and 'Containers' sections.

**Top Screenshot: Images**

The 'Images' tab is selected. It shows a list of images under the 'Local' tab. The table lists two images:

| Name            | Tag    | Image ID     | Created      | Size     | Actions |
|-----------------|--------|--------------|--------------|----------|---------|
| jenkins/jenkins | lts    | e82bbdcffb63 | 17 days ago  | 810.2 MB | [Icons] |
| hello-world     | latest | 96498ffd522e | 3 months ago | 25.87 KB | [Icons] |

System status at the bottom: Engine running, RAM 4.94 GB, CPU 0.00%, Disk: 2.94 GB used (limit 1006.85 GB). Version v4.79.0.

**Bottom Screenshot: Containers**

The 'Containers' tab is selected. It shows a list of running containers. The table lists two containers:

| Name    | Container ID | Image       | Port(s)     | CPU (%) | Last s | Actions |
|---------|--------------|-------------|-------------|---------|--------|---------|
| jenkins | e923d23387c9 | jenkins/jen | 50000:50000 | 0.72%   | 11 mi  | [Icons] |
| hello   | 18c6613930aa | hello-world |             | 0%      | 38 sec | [Icons] |

System status at the bottom: Engine running, RAM 4.95 GB, CPU 0.63%, Disk: 2.94 GB used (limit 1006.85 GB). Version v4.79.0.
